

Field Supervisor – Well Intervention

Are you looking for a new challenge? For our client in Assen we are looking for a Field Supervisor.

The assignment:

The Field Supervisor will supervise the running of thru-tubing well intervention equipment and services in the field whilst conducting the work in a safe and professional manner. The Field Supervisor will work on onshore and offshore sites with downhole tools and provide technical and subject matter advice to the client whilst on location in order to provide efficient solutions.

Qualifications:

- A minimum of seven years' experience in Thru-Tubing Operations
- Excellent Mechanical Aptitude
- Work well with little supervision
- Personal commitment to Quality, Health, Safety and the Environment
- Excellent communication skills, in Dutch as well as in English and preferably German.

Company information:

Reservoir Group is an international leader in the niche oilfield activities of reservoir sampling, analysis and evaluation, well monitoring, specialist well services and premium drilling services. We are committed to helping clients reap full value from their energy resources with smart, high value, low-cost solutions.
